

LEARNING LOG

Learning Log

Turn missed, guessed, and uncertain questions into a clear next move. After each practice set, add one row per question worth reviewing. Spend the most time in the “What I misunderstood” column — plain sentences, not codes.

How to use this log

1. Add a row for every question you missed, guessed on, or felt unsure about — one question per row.
2. Fill in the type and miss columns from the options below, then write what you misunderstood in your own words.
3. Choose one next practice move per row. Update the Status column as you review, practice, and retest.

Options for the columns

Each column uses a fixed set of options. Copy the chip text into the cell (in the Hub, the same options are drop-downs).

Question type	Punctuation	Sentence Boundaries	Agreement	Pronouns	Modifiers	Verbs and Tense	Word Choice	Concision	Transitions
	Rhetorical Skill	Organization							
Miss type	Misread the question	Misread the passage	Picked a true but wrong answer	Fell for an overreach	Missed contrast / shift				
	Did not return to the text	Vocabulary gap	Careless						
Next practice move	Review rule	Redo question without choices	Drill same question type	Bring to the next meeting	Retest later				
	Ask about it at the next meeting								
Status	Not reviewed	Reviewed	Practiced	Retested					

Log

Add rows as you go (right-click a row → Insert row below).

Date	Set / Lesson	Q #	Question type	Miss type	Mine → correct	What I misunderstood	Next practice move	Status
